

**Workshop on flash flood and debris flow forecasting  
in Mediterranean areas :  
current advances and examples  
of local operational systems**

**Toulouse**

**Centre International de Conférence, Météopôle**

**4 February 2011**

**Organised by SCHAPI/MEDDTL**

**Program**

**IMPRINTS** 

<http://www.imprints-fp7.eu/>

8h30 – 9h00	<b>Registration, poster posting</b>	
9h00 – 9h10	Welcome and opening	C. Wittwer SCHAPI/BRGM
<b>Session 1 : Long term management of flash flood and debris flow at European and French level</b>		
		<b>Chairman : André Bachoc</b>
9h10 – 9h40	The flood directive : specificities related to flash flood and debris flow	M. Brättemark DG Environment/European Commission
9h40 – 10h00	The recent masterplan for mitigation of coastal and flash floods, following the 2010 dramatic events in France	J-Ph. Lalande MEEDTL/Natural and Hydraulic Risk Department
10h00 – 10h30	Coffee break	
<b>Session 2 : Recent advances in flash flood and debris flow forecasting</b>		
		<b>Chairman : Daniel Sempere Torrès</b>
10h30 – 11h00	Setting the scene and future developments	Prof Isztar Zawadzki MacGill University/Canada
11h00– 11h20	Current developments for flash flood forecasting at Météo France	JM. Carrière Forecasting Department/Météo France
11h20 – 11h40	Advances of localized flash floods forecasting for transportation network (the French PrediFlood project)	O.Payraastre IFSTAR
11h40 – 12h00	The HYMEX perspective: Toward a major 2010-2020 field experiment	B. Vincendon/Météo France G.Delrieu/LTHE, Grenoble
<b>Session 3 : Poster session</b>		
		<b>Chairman : Isabelle Leleu</b>
12h00 – 14h00	Group photo Lunch Poster session	
<b>Session 4 : Examples of experiments and local systems</b>		
		<b>Chairman : Caroline Wittwer</b>
14h00 – 14h20	The June 2010 catastrophe of Draguignan, Var	J. Pansu/Eastern mediterranean Regional Flood Forecasting Centre P. Javelle/Cemagref
14h20 – 14h40	The Grand Delta operational flood forecasting centre and the Gardon d'Anduze test site	Y. Laborda Head of Forecasting Unit Grand Delta Flood Forecasting Centre
<b>Session 5 : General Discussion</b>		
		<b>Moderator : Keith Beven, Uni. Lancaster</b>
14h40 – 16h00	How to enlarge use of national products? Which FF and DF forecasting information are needed to manage more efficiently the risk? What should be provided to the authorities to assist the Flood directive implementation?	
16h00 – 16h15	Closure of the meeting	Daniel Sempere Torrès
